PROJECT / TRAINING:

The Agriculture Management System provides a comprehensive platform for farmers to manage their agricultural activities efficiently. It covers farm management, including product planning, monitoring, and resource tracking, as well as inventory management for grains, vegetables, and other supplies. The system also offers a marketplace where farmers can sell their products directly to consumers, retailers, or wholesalers, ensuring better profitability and transparency. By supporting smart farming practices and providing a user-friendly interface, the system helps farmers make data-driven decisions, adopt modern techniques, and stay connected to the market.
