## PROFESSIONAL SUMMARY

Third-year engineering student with hands-on experience in web and Android development, and a strong foundation in databases and software fundamentals. I’ve explored 3D modelling and have a growing interest in machine learning and NLP, with some practical exposure to real-world applications. I’m comfortable working with modern tools, writing efficient code, and quickly adapting to new technologies.

## EDUCATION

|                                                                                                              |                            |
|--------------------------------------------------------------------------------------------------------------|----------------------------|
| • <b>International Institute of Information Technology, Pune</b><br><i>Bachelor of Computer Engineering.</i> | CPI - 9.5<br>2023 - 2027   |
| • <b>Class XII(HSC)</b><br><i>Sona I Science Junior College, Pune.</i>                                       | Percentage - 76.33<br>2023 |
| • <b>Class XII(HSC)</b><br><i>Sona I English Medium High School, Pune.</i>                                   | Percentage – 96.04<br>2021 |

## SKILLS

- **Languages:** JAVA, Python, C++, C#
- **Software Development:** React.js, HTML, CSS, JavaScript, Node.js, REST APIs, JWT
- **Data Science:** Data Analysis, Python Libraries (Numpy, Pandas, Spacy, Seaborn, etc)
- **Databases:** MySQL, MongoDB, Oracle SQL, PostgreSQL
- **Soft Skills:** Event Management, Effective Communication

## EXPERIENCE

### - AI and Data Intern | Bharat Software Solutions (Aug 2025 – Oct 2025)

Worked on building an **automated resume screening system** to simplify candidate filtering. Used Python for web scraping and data preprocessing, including cleaning and structuring unorganized data. Performed exploratory data analysis and created visualizations to extract useful insights. Developed a lightweight web interface using Flask to make the system easy to use and interact with.

### - Android App Developer Intern | Futurism Technologies Inc (Feb 2026 – Apr 2026)

Developed a native Android **Inventory management application** using Kotlin in Android Studio to track and manage items efficiently. Implemented core functionalities such as adding, updating, and monitoring inventory with a MySQL database integrated via a .NET backend as per project requirements. Focused on building a responsive UI, ensuring smooth data flow between the app and server, and maintaining reliable performance.

## PROJECTS

- **I2IT Alumni Association Portal:** Manage the college Alumni network. Built web application using HTML, CSS and Javascript having various features like job portal, mentoring sessions, etc that connects alumni to current college students.
- **Disease Prediction System:** Developed a simple disease prediction system using basic machine learning techniques to suggest possible illnesses based on user-input symptoms. Implemented data preprocessing and trained a model for prediction, with a straightforward interface for user interaction.
- **Second Hand Book Exchange System:** A simple web-based application that allows university students to register, log in, and exchange second-hand books. Built using HTML, CSS, and PHP, and hosted locally using XAMPP or WAMPP.

## PARTICIPATION & ACHIEVEMENTS

- Shortlisted: Internal SMART INDIA HACKATHON (SIH) 2025
- 2nd Winner: AVINYA 2K25 State Level Project Competition
- Participated in Flipkart Grid 6.0
