LinkedIn GitHub LeetCode

SUMMARY

Computer Science (Cyber Security) undergraduate with a proven track record of solving 190+ LeetCode problems and engineering scalable full-stack applications using Spring Boot, React, and AWS microservices. Experienced in designing secure RESTful APIs, implementing stateless JWT authentication, and orchestrating containerized workflows with Docker and Kubernetes. Passionate about optimizing backend performance and building resilient, cloud-native production systems.

EXPERIENCE

AI Intern - TechSaksham Program Dec 2024 - Jan 2025
Microsoft & SAP (via AICTE & Edunet Foundation) Remote
Project Repository: [Image Generation Using Stable Diffusion](#)

- Developed a Stable Diffusion-based image generation system using Python, HuggingFace, and Google Colab.
- Generated high-quality images from text prompts and evaluated output consistency across test cases.
- Explored deep learning pipelines and model inference optimization techniques.

TECHNICAL SKILLS

- Languages:** C++, Java, Python, HTML, CSS, JavaScript
- Frameworks:** Spring Boot, React
- Technologies:** REST APIs, JWT, Hibernate, MySQL, MongoDB
- Cloud & DevOps:** Docker, Kubernetes, AWS
- Core Subjects:** Data Structures, Operating Systems, DBMS, Computer Networks
- Tools:** Git, GitHub, VS Code, IntelliJ

ACHIEVEMENTS

- Solved 190+ problems on LeetCode covering arrays, String, Stack and Queue, Linked List, Dynamic Programming, and Trees
- Active problem solving on GeeksforGeeks and competitive programming platforms
- Completed AICTE Microsoft AI/ML Internship focused on Stable Diffusion and Image Generation.

PROFILE LINKS

- [LeetCode](#): Solved 190+ problems
- [CodeForces](#): Solved 30+ problems

EDUCATION

B-Tech CSE (Cyber Security) - 7.70 CGPA
Shiv Nadar University
2023 - Present Chennai, Tamil Nadu
Higher Secondary (MPC) - 95.5%
Sri Chaitanya Mayuri
2021 - 2023 Vijayawada, AP
Secondary - 85.22%
Jawahar Navodaya Vidyalaya
2016 - 2021 Madanapalli, AP

PROJECTS

CodeHub - Coding Interview Preparation Platform
Java | Spring Boot | React | MySQL | Docker | AWS

- Developed a full-stack coding interview platform, engineering REST APIs for problem management, automated user streaks, and live leaderboards.
- Designed interactive React dashboards for problem-solving workspaces, real-time analytics, and user activity monitoring.
- Containerized microservices using Docker, orchestrating scalable deployments with Kubernetes across AWS cloud infrastructure.
- [GitHub](#)

SpendLens AI Audit
Next.js | Spring Boot | OpenAI API | Tailwind CSS | H2 Database | REST APIs

- Built and deployed a full-stack AI-powered SaaS platform for AI spend analysis and cost optimization
- Integrated OpenAI API to generate executive summaries and AI-driven optimization insights
- Developed REST APIs using Spring Boot for audit generation, recommendation processing, and shared reports
- Architected responsive dashboards using Next.js and Recharts to visualize complex cost trends, deploying the full-stack application seamlessly using Render.
- [Live Demo](#) | [GitHub](#)

Secure File Storage System
Java | Spring Boot | MySQL | JPA | BCrypt | JWT

- Developed a secure backend file management system using Java and Spring Boot, utilizing a strict layered architecture for scalable data processing.
- Architected a robust security perimeter implementing stateless JWT-based authorization, Role-Based Access Control (RBAC), and BCrypt password encryption.
- Engineered optimized RESTful APIs for user registration, secure authentication, and multi-user file handling backed by MySQL and Spring Data JPA.
