ABOUT ME

Java Backend Developer with expertise in building scalable, high-performance RESTful APIs and full-stack applications using Java, Spring Boot, .NET Core, and React JS. Skilled in OOP, data structures, OS concepts, and software development methodologies. Passionate about delivering efficient, maintainable, and production-ready software solutions.

TECHNICAL SKILLS

- Languages: Java, C++, JavaScript, C#
 - Frameworks: Spring Boot, .NET Core, Web API, Entity Framework
 - Web Technologies: REST APIs, Spring Boot REST API, HTML, CSS, Microservices, React JS
 - Databases: MySQL
 - Concepts: OOP, Data Structures & Algorithms, Concepts of OS, Software Development Methodologies
 - Tools: Git, GitHub, Eclipse IDE, Visual Studio
-

PROJECTS

Rydora - A Driver Connect

Technologies: Java, Spring Boot, REST API, MySQL, .NET Core, React JS

- Rydora - A Driver Connect – A platform to efficiently connect users with drivers
- Developed RESTful APIs connecting users with drivers in real-time
- Implemented booking management, driver availability, and notification features
- Designed scalable backend architecture supporting concurrent requests

Project Repository: <https://github.com/dacaug2527-collab/rydora>

Fire Alarm Using Thermistor

- Built a fire detection system using thermistor sensors
 - Designed alert system for real-time fire monitoring and safety
-

EDUCATION

- Post Graduate Diploma in Advanced Computing (PG-DAC) – **CDAC, Pune, 2026**

Technologies: Java, Spring Boot, REST API, MySQL, .NET Core, React JS

- B.Tech in Electrical Engineering – JECRC, Rajasthan, 2018
-

CERTIFICATIONS & ACHIEVEMENTS

- Completed intensive **PG-DAC** course with focus on Java and .NET backend development
- Built multiple projects demonstrating full-stack and backend system integration
